Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An undergraduate engineering student struggling with complex subjects.	Find immediate, accurate answers to specific academic queries during late-night study sessions.	I get stuck waiting for professor email replies or scanning through long, unhelpful forum threads.	Standard web searches provide generic explanations instead of direct academic answers.	Frustrated and anxious about falling behind in class.
PS-2	A student preparing for comprehensive mid-term examinations.	Self-evaluate my grasp of specific textbook chapters using targeted multiple-choice questions.	Generating manual quizzes is time-consuming and online practice tests don't match my unique syllabus.	Most static quiz platforms do not allow uploading custom study context for tailored self-testing.	Unprepared and unsure of which conceptual gaps to fix.
PS-3	A university student encountering advanced technical topics for the first time.	Break down intricate, jargon-heavy academic principles into clear, basic concepts.	Traditional reference textbooks use overly convoluted language that is difficult to parse.	Traditional learning resources lack an adaptive, student-friendly explanation lens.	Overwhelmed and discouraged by the learning curve.
PS-4	A busy student balancing extensive course reading materials.	Efficiently extract core themes and key takeaways	Reading hundreds of dense pages word-for-word	I lack an interactive tool that can instantly	Stressed by the sheer volume of reading assignments.

		from massive research documents and PDF packets.	eats up all my available revision time.	condense long blocks of text into scannable points.	
PS-5	A self-guided learner tackling a brand-new engineering subject domain.	Formulate a structured, step-by-step roadmap showing exactly where to begin and how to advance.	I do not know the correct order of prerequisite topics or what quality resources to look up.	Curated educational roadmaps are scattered across the web and rarely adapt to a specific subject query.	Confused and directionless without a solid plan.
