

Project Demo Planning

Date	11 July 2026
Team ID	XXXXXX
Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Architecture	Explain the academic problem statement, stack architecture (Streamlit + FastAPI), and hybrid cloud-local LLM routing.	2 mins	Manasa Rayala
2	UI Dashboard & Navigation	Showcase the customized "Aurora Blue" dark theme, hidden Streamlit overlays, and interactive card navigation grid.	2 mins	Manasa Rayala
3	Cloud-Based Features	Demonstrate the Q&A Academic System, Text Summarizer, and the JSON-parsed Interactive Quiz Generator with real-time feedback.	4 mins	Manasa Rayala
4	Local AI Feature	Show the local Concept Explainer in action, highlighting how it runs on-device using LaMini-Flan-T5 without API costs.	2 mins	Manasa Rayala
5	Future Roadmap	Discuss future optimization plans and the pending Personalized Learning Path module.	1 mins	Manasa Rayala
6	Live Q&A Session	Address evaluator questions regarding model latency, API integration, and performance benchmarks.	3 mins	Manasa Rayala

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Highlight the difficulty students face navigating multiple learning platforms, presenting EduGenie as a unified solution.
2	Solution Overview	Present a brief layout of the Streamlit frontend connecting smoothly to the FastAPI backend framework.

3	Live Feature Demonstration	Walk through the dashboard. Input physical academic text, run a summary, generate an automated quiz, and execute a local model explanation.
4	Q&A Session	Prepare to explain developer choices, such as utilizing Gemini 2.5 Flash for heavy lifting and local pipelines for privacy-first operations.
